Space Management

Learning Objectives

Prerequisites:

This workshop presumes that participants have taken the ArchivesSpace Basics 1 or 2 day workshop; or have practical experience with ArchivesSpace.

Learning objectives:

Upon completing this workshop, you'll have learned how to use ArchivesSpace to:

- Create and manage physical containers within a repository.
- Create and manage physical locations within a repository.
- Automatically generate the volume measurement of a resource.
- Track available space within repository storage areas.
